

Pacesetter in LNG

Flexibility and ingenuity has made KBR a world leader in the design and construction of many of the world's liquefied natural gas (LNG) facilities. We were first contractor to bring LNG to Australia, Egypt, Malaysia and Nigeria. Our construction

alone accounts for over 85 million tonnes per year of liquefaction capacity worldwide. From the east coast of the United States to the islands of Indonesia, KBR's ability to deliver complex projects in challenging locations makes us a proven partner. Visit www.kbr.com/lng
